

## CL Sterling & Son for corporate, hospitality & residential

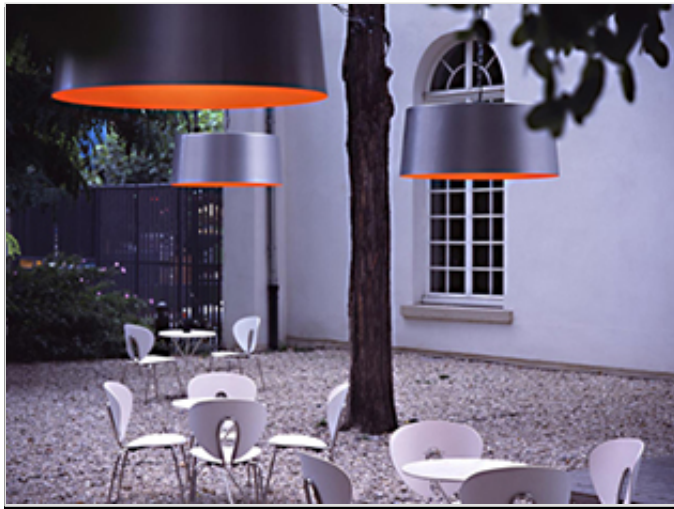

Since its inception in 2001, [CL Sterling & Son](#) has worked with both architects and interior designers to custom fabricate site-specific light fittings for corporate, hospitality and residential environments. A great example of this partnership is their work with [Gary Lee Partners](#). This award-winning international design firm specified CL Sterling fixtures for the luxurious public spaces in [The Austonian](#), the tallest residential building in Austin and in the Lone Star State. A pair of 8-Arm Chandeliers in Bronze (AC 41) from the Archer Collection adorn the walnut paneled lobby, and over 400 Tall Wall Sconces (AC 26) illumine the hallways of its 56 floors.

The Hanging Shades (FS 43) can be found in the Billiard and Game Room – also known as The Lone Star Bar – on the 10th floor.

Closer to home, the Terrace Ballroom at [Le Meridien Dallas, The Stoneleigh](#), has been renovated for corporate meetings. The gorgeous new space also features the Hanging Shades from CL Sterling. The Brushed Nickel or Dark Bronze cylinder is handcrafted in Portugal, and the interior can be customized with Benjamin Moore paint or a PANTONE color. This fixture is available in 3 sizes: 15", 23.2" or 31" diameter and can be customized for indoor or outdoor use.
